

Your Community Map

Step 1: Create Your Own Community Map (5 Minutes)

Put your institution in the centre and draw links to groups and individuals you already engage with and those you haven't yet. This can reveal potential collaborators hiding in plain sight.

Step 2: Identify the most relevant groups in your community and collaboration opportunities (5 minutes):

Type of groups in your community	Group 1...	Group 2...	Group 3...
Who's nearby that we've never invited in?			
What issues matter to people in our area?			
How could our site become more useful or meaningful in the community's daily live(s)? (Collaboration opportunity)
